Work Experience

Data Science Intern

Remote

AMP Beauty LA

Dec 2024 - Jul 2025

- Analyzed datasets and took initiative to develop an insightful, customer-facing dashboard using Python and Power BI
- Integrated data from Shopify, Target, and Macy's APIs to extract and analyze relevant metrics and KPIs
- Worked closely with the CEO and board members to provide data-driven recommendations, supporting key initiatives

Licensed Life Insurance Agent

Remote

Karma Financial Group

Apr 2025 - Mar 2026

- Generated over \$25,000 in annualized premium by conducting personalized phone consultations
- Built and maintained systems for tracking sales activity, client status, and policy performance across carriers
- Refined communication and interpersonal skills by explaining complex information clearly and fostering client relations

Education

University of California, Los Angeles

Los Angeles, CA

Master of Applied Statistics and Data Science (MASDS)

Expected Start: Fall 2026

University of California, Santa Barbara

Goleta, CA

Bachelor's of Science in Statistics and Data Science (3.91 / 4.00 GPA)

Sep 2023 - Present

- UCSB Data Science Club, UCSB Men's Club Soccer, UCSB Persian Student Group
- Relevant Coursework: Data Science, Business/Entrepreneurship, Math/Statistics, Machine Learning

Relevant Projects

Modeling Crypto Risk Neutral Density

Jan 2026 - Feb 2026

- Extracted risk-neutral probability densities for BTC and ETH from live options data using Breeden-Litzenberger
- Smoothed implied volatility surfaces and differentiated call price curves to recover price distributions
- Compared market-implied vs historical lognormal distributions to quantify the variance risk premium
- Built and deployed an interactive Streamlit web app pulling live data from Deribit and CoinGecko

Gamma and Beta Random Number Generators

Jan 2026 - Feb 2026

- Implemented three Gamma sampling algorithms in R based on a published acceptance-rejection framework
- Built a master routing function connecting multiple algorithms based on shape parameter value
- Used polynomial squeeze bounds to dramatically reduce expensive log/exp evaluations per sample
- Verified output distributions against theoretical Gamma and Beta CDFs using Kolmogorov-Smirnov tests

Spotify Hit Prediction Model

Dec 2025 - Jan 2026

- Built Random Forest classifier predicting hit songs with 94% accuracy across 114,000 tracks
- Created a data pipeline handling missing values, scaling numeric features, and encoding 114 genre categories
- Translated model results into visual reports with a functioning web app with search functionality

Skills

Technical Skills: Python, R, SAS, SQL, Power BI, Pandas, Excel, SciPy, Big Data, A/B Testing, Data Analytics, Data Analysis, Statistics, LLMs, AI, Version Control, Git, Data Visualization, HTML/CSS, JavaScript
